

## Press Release

### **Dayville Fire Company Implements OnSite ERT™**

Ann Arbor, MI -- February 20, 2008 – The Dayville Fire Company in Dayville, CT has implemented OnSite ERT for tracking and locating its firefighters on-scene at emergency events. The Department began training on the system in February 2008, outfitting all of the department's response vehicles and personnel with OnSite wireless tracking tags and receivers.

When asked why he chose OnSite ERT, Fire Chief Michael Hewko replied, "I was looking to replace our old accountability system with something more modern. I wanted to be able to track my firefighters on scene, instead of just know who was there. OnSite ERT was the only product that offered the real-time tracking I was looking for and I immediately knew it would improve safety". Chief Hewko added "The ease of use and deployment of the OnSite ERT System was also very attractive". The Dayville Fire Company protects approximately 20,000 residents over an area of 50 square miles.

### **About ERT Systems, LLC**

Based in Ann Arbor, Michigan, ERT Systems LLC has developed OnSite ERT™, a wireless system for tracking and locating personnel and equipment automatically and in real-time at emergency events. First installed in early 2006 at the Macomb County Community College Firefighter Training Facility, OnSite ERT has earned ERT Systems a number of awards and accolades, including recognition at the Michigan Homeland Security Consortium's SELECT awards. OnSite ERT is on the DHS Authorized Equipment List and is approved for grant purchase. For more information or to view an on-line demo, see [www.OnSiteERT.com](http://www.OnSiteERT.com).
