

## Press Release

### **State of Oklahoma Initiates Two-County Pilot of OnSite ERT™**

Ann Arbor, MI -- January 28, 2009 -- ERT Systems, LLC, a leading provider of automated resource tracking systems for first responders, has announced that Murray and Garvin counties in Oklahoma will participate in a pilot program, selecting OnSite ERT as their primary accountability solution. Deploying OnSite ERT county-wide will promote interoperability between departments, streamlining mutual-aid response and post-incident reporting, and provide a range of additional benefits from performance analysis to payroll reporting.

The two counties will use OnSite ERT to automatically track and locate firefighters and equipment when deployed at emergency events using its wireless ID tags, portable receivers, and the PAR incident command software. Combined, the counties represent about 600 firefighters serving a population of 40,000 across 1,200 square miles.

#### **About ERT Systems, LLC**

Based in Ann Arbor, Michigan, ERT Systems LLC offers OnSite ERT™, a portable and rapidly deployable system for tracking and locating personnel and equipment on-scene at emergency events.

First installed in 2006 at the Macomb County Community College Firefighter Training Facility, OnSite ERT has earned a number of awards and accolades, including recognition at the Michigan Homeland Security Consortium's SELECT awards.

OnSite ERT is on the DHS Authorized Equipment List and is approved for grant purchase. For more information or to view an on-line demo, see [www.OnSiteERT.com](http://www.OnSiteERT.com).
